PERFORMANCE

Range ................................................................. 0 - 250 ppm
Maximum overload ............................................. 1000 ppm
Sensitivity ......................................................... 320 - 480 nA/ppm NO
Zero in air at 20 °C...............................-0.06 to +4.5 ppm NO
Resolution ......................................................... 0.5 ppm NO
Linearity ...............linear across range
Response time, t90 ................................................... <35 s
Long-term output drift........................................ <2% signal/month
Warranty .......................................................... 2 years

OPERATING CONDITIONS

Temperature range ........................................... -20 to +50 °C
Operating humidity .................. 15 - 90% RH (non-condensing)
Pressure range .......................... 90 - 110 kPa (nominal)
Operating circuit .......... see Electrochemical Toxic Sensor
Applied potential ..................... +300 mV
Storage life ............ 6 months in original packaging (0 - 25 °C)

PHYSICAL CHARACTERISTICS

Label colour ......................................................... silver
Weight .......................................................... 5 g approx.
Dimensions ............................... see outline

This device is designed to be RoHS compliant.

CROSS-SENSITIVITY DATA

</table>

Important Note

Do not solder to the connector pins as this may damage the sensor and thereby invalidate the warranty.

Details on recommended connector pins can be found in the Frequently Asked Questions within the Gas Sensor section of the SGX website.
